Do you have a Flydat and are you disappointed with?

- missing the oil pressure information for 20 second during every engine start up due the „CONTACT SERVICE“ message?
- no available statistic of maximum reached value of the measured parameters?
- no possibility to download measured history into the computer for further analysis?

Is the answer YES?

Then easily replace the old FLYdat with new model within few minutes! The instrument size are identical, just take out 4 screws. Is that easy!

Enjoy new features:

STATUS - lamp show you status of your Engine.
RED – means some measured values has been exceeded
GREEN – engine is ready for TAKE-OFF
GREEN/FLASHING – statistic on the display

USB – simply connect the Flydat with your computer and download history of measured parameters from long-term memory.

BUTTON – press the button and immediately get the statistic of measured parameters

Do not be sad of your dashboard, simply change your old Flydat with a new one, giving you new range of possibilities!

For more information's about FLYdat P/N: 886 858, please contact your local Rotax engine distributor.
